PROFILE SUMMARY

Computer Science graduate seeking a Python Developer role to apply Python, web development, and problem-solving skills while contributing to impactful projects and growing as a developer.

EDUCATION

- Bachelor of Science - Computer Science**

April - 2022

College of Applied Science, Calicut – University of Calicut

SKILLS SUMMARY

- **Programming Languages:** Python, SQL, JavaScript
- **Frameworks & Libraries:** Django, Flask, Django REST Framework (DRF), React (Basic)
- **Web Technologies:** HTML5, CSS3, Bootstrap
- **Databases:** MySQL, PostgreSQL, SQLite
- **Tools & Platforms:** Git, GitHub, Version Control, VS Code, PyCharm, Postman
- **Cloud & Deployment:** Render, Vercel, PythonAnywhere, Basic AWS
- **Core Concepts:** Object-Oriented Programming (OOP), REST APIs, Authentication (JWT), Debugging, API Testing
Data Structures and Algorithms (DSA)
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Adaptability

PROJECTS

Ecommerce Web Application | Django

- Developed a full-stack online bookstore with authentication, book listing, cart and order management.
- Implemented features such as genre-based filtering, search functionality, Cash on Delivery (COD) checkout book sorting (A–Z sorting, price low to high, price high to low) and pagination.
- Developed and maintained backend functionalities using Django ORM and SQLite
- Built responsive frontend interfaces using HTML and CSS for improved user experience across devices.
- Performed debugging and feature optimization to improve application usability and performance.
- Deployed the application on Amazon Web Services (AWS EC2) using Gunicorn and Nginx, and also hosted the project on PythonAnywhere.
- **Technologies:** Python, Django, HTML, CSS, SQLite, API, Python Anywhere

Job Portal Backend API | Django Rest Framework + JWT Authentication

- Built a RESTful API with role-based access control using JWT authentication (SimpleJWT)
- Implemented job posting, application management, resume upload and status management features
- Designed maintainable API endpoints and performed API testing and debugging using Postman.
- Integrated secure authentication and authorization workflows for backend operations.
- **Technologies:** Python, Django, Django Rest Framework, SimpleJWT, SQLite, Postman
[GitHub](#)

Task Management Full Stack Web Application | Django Rest Framework + React

- Developed a full-stack task management application with user authentication using React and Django REST Framework.
- Implemented CRUD operations, authentication workflows, and task management features.
- Deployed frontend and backend applications on cloud hosting platforms including Vercel and Render.
- **Technologies:** React, Django REST Framework, SQLite, Vercel, Render
